Outlook and Strategy

FY2024

Outlook

- Strong long-term demand outlook for minerals and metals relevant to the ongoing energy transition will continue to attract capital to build global supply
- The value of gold remains high, driven by demand and global geopolitical, and associated economic risks
- Australia's railway construction and maintenance activity outlook is strong, supported by a number of significant publicly funded projects
- Domestic manufacturing continues to present opportunities for the Industrial Processes sector, as does the ongoing development of emerging markets in support of the energy transition, including waste and recycling, water and wastewater, and hydrogen
- Transformation of the global energy sector from fossil-based to zero-carbon sources represents a period of innovation and opportunity in the development of new systems that can operate on low carbon energy sources, whilst maximising waste recovery and reuse
- Lycopodium's expertise will remain sought after given the macro environment and other drivers

Strategy

Geographical Reach

Continued focus on achieving broader geographical reach – across Asia-Pacific and the Americas

Balanced Portfolio

Balanced project delivery portfolio – mix of EPCM and EPC

People

Continue to attract, engage, inspire and retain a high performing, global, professional workforce

Knowledge Management

Investment in systems to drive efficiency and facilitate work sharing across divisions and subsidiaries globally

Innovation

Investment in innovation and emerging technology – digital engineering and engagement with industry (eg FBICRC and CSIRO)

Energy Transition

Diversify sectoral exposure into green energy markets including energy storage and the global battery revolution
